Lesson Two

By Chang Liu

Founder, CEO, Startup Training, World Internet Billionaire.

How did the richest and most successful people get their business ideas?

At the start of Internet, Jeff Bezos quit his job and started driving to the west coast. He had not decided what to do, but he already knew he is going to make a decision.

He chose to build a store. It is brilliant.

The ideas are carefully chosen. They enter the right business and fight for turf.

Successful companies don't represent themselves. They represent their time.

The richest make money by having many repeated business, each making a dollar. The right idea is therefore to start a business that you can do a billion deals, each making a tiny small amount of money.

Steve Jobs first sold PCs, then phones, and then songs, and then software.

Coca-cola, sold billions of drinks a day.

Amazon, sold millions of books a day.

Elon Musk, trying to sell cars, which may be something everyone need.

Walmart, sells billions of items a day.

Saudi Arabia royal family, billions of barrels a day.

Why do most people's dreams not come true?

Mistake that took me years to understand:

I used to see my life like a checklist.

Pre-school — check!

Elementary school — check!

High school — check!

College — check!

Work — check!

Marriage — check!

Is life a checklist, or do I have the FREEDOM to pursue my dreams?

For years I felt lost and confused.

To answer your question, why do most people's dreams never come true?

It took me years to realize that I was mostly living my life to meet OTHER people's expectations, not mine.

Motion without direction is hollow and foolish.

Living life without a clear vision is a painful mistake I wish I had corrected earlier in my life. To fulfill YOUR dreams, your actions need to be aligned with your aspirations.

It's never too late!

Are you pursuing YOUR goals or someone else's?
